What is the product?

Type: This product is a Société d'Investissement à Capital Variable (SICAV).

Term: The fund has been established for an indefinite period of time. The PRIIP Manufacturer reserves the right to liquidate the fund, subject to approval by the Board of Directors.

Objectives: The fund seeks long-term capital appreciation and current income by investing, under normal market conditions, at least 80% of its total assets in dividend-paying emerging market equity securities across any market capitalisations. Equity exposure is achieved directly through investment in equity securities and/or indirectly through participatory notes, convertible securities, equity linked notes and/or certificates. The fund may also invest in equity securities through ADRs, CDRs, EDRs, GDRs, IDRs and similar depository receipts as well as equities denominated in U.S. dollars issued by non-U.S. issuers. The fund promotes environmental and/or social characteristics but does not have a sustainable investment objective. Emerging market equity securities are securities issued by companies that are traded in, have their primary operations in, are domiciled in or derive a majority of their revenue from emerging market countries as defined by the MSCI Emerging Markets Index. The fund may invest up to an aggregate of 20% of its total assets both directly and indirectly in equity securities of Chinese companies listed on the Shanghai Stock Exchange or Shenzhen Stock Exchange (commonly known as China A shares). Equity securities of Chinese companies are securities issued by companies with their registered offices in the People's Republic of China or exercising a predominant part of their economic activities in the People's Republic of China. The fund may use futures, forward contracts, options or swap agreements, as well as other derivatives, for hedging or efficient portfolio management purposes. The fund may hedge the portfolio's foreign currency exposure by purchasing or selling currency futures and foreign currency forward contracts. However, under normal circumstances, the fund will not engage in extensive foreign currency hedging. The fund's investment strategy includes both a top-down strategy, which takes account of overall economic and market trends in each country, and a bottom-up strategy, in which the fund uses fundamental research for security selection. The fund seeks to manage towards a low carbon portfolio and targets an overall carbon intensity that is at least 30% lower than that of the MSCI Emerging Markets Index. The fund focuses on companies where the potential return is determined to be in excess of the fund's estimation of equity value at risk from material ESG factors by investing at least 64% of the fund's assets in companies that it believes are capable of managing both ESG and operational risks through responsible practices on material ESG issues or companies that it believes have the potential for improving their operational and ESG profiles over time. Through the use of a negative screening process, the fund seeks to exclude certain securities in accordance with its exclusion policy. A copy of the methodology and list of excluded investments (including the revenue thresholds) is available under [allspringglobal.com](https://www.allspringglobal.com). Shareholders may also request a copy from the fund or the Management Company. The fund is actively managed but uses the MSCI Emerging Markets Index as a reference for selecting investments and for performance comparison. The investments of the fund may deviate significantly from the components of and their respective weightings in the benchmark. You may redeem your investment upon demand on each business day when banks in Luxembourg are open for normal business and the New York Stock Exchange is open for trading (a "Business Day"). This share class intends to distribute dividends gross of expenses quarterly.

Intended Investor:

This product is intended for institutional investors of all knowledge and/or experience levels who are seeking long-term capital appreciation and current income offered through investment in equities and who are prepared to experience higher levels of volatility in pursuit of higher returns, who have an investment horizon of 5 years or longer and who have a risk tolerance compatible with the product's SRI rating.

Depository: Brown Brothers Harriman (Luxembourg) S.C.A.

Further Information: This document describes a share class of a sub-fund of Allspring (Lux) Worldwide Fund. The assets and liabilities of each sub-fund are segregated and no sub-fund is responsible for the liabilities of another. The prospectus and financial reports are prepared for Allspring (Lux) Worldwide Fund as a whole. You may obtain free copies of these documents in English, French, and German from Allspring (Lux) Worldwide Fund, c/o Brown Brothers Harriman (Luxembourg) S.C.A., 80 Route d'Esch, L-1470 Luxembourg or at [allspringglobal.com](https://www.allspringglobal.com).

Price Publication: Net asset value per share is calculated on each Business Day and is available in local media and/or with the fund's local agent in certain countries and at the registered office of the fund.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk indicator

< Lower risk

Higher risk >>

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The risk indicator assumes you keep the product for a minimum of 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity of the fund to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product / a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended minimum holding period: 5 Years

Investment: 10 000 EUR

Scenarios		1 Year	5 Years
Minimum: There is no minimum guaranteed return. You could lose some or all of your investment.		(recommended holding period)

What happens if Allspring Global Investments Luxembourg S.A. is unable to pay out?

The value of your investment would not be affected by a default by the PRIIP Manufacturer. The value of your investment is not guaranteed but you will not face financial loss greater than the amount of your investment.

What are the costs?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and should show you the impact that all costs will have on your investment over time.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods:

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10 000 is invested.

Investment: 10 000 EUR	If you exit after 1 Year	If you exit after 5 Years
Total Costs	120 EUR	767 EUR
Annual Cost Impact	1.2 %	1.26 %

This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 5.71% before costs and 4.46% after costs.
